[illegible]

Figure 1 consists of two panels, (a) and (b), showing the effect of 100% O<sub>2</sub> on the rate of oxygenation of hemoglobin. Both panels plot the rate of oxygenation (y-axis) against time (x-axis). Panel (a) shows a control experiment where the rate of oxygenation increases linearly over time. Panel (b) shows an experiment with 100% O<sub>2</sub>, where the rate of oxygenation is significantly higher, reaching a plateau earlier than the control.
